Flutter Developer | Software Development Industry

Transforming business requirements into real-world mobile solutions that are both user-friendly and technically robust.

## Career Objective

A Flutter developer working in the software development industry, focused on building scalable, secure, and high-performance mobile applications. With hands-on experience in clean architecture, state management (Bloc/Cubit), and REST API integration using Dio, bringing both technical depth and a problem-solving mindset to every project. I've developed production-level apps that include authentication flows, category-based filtering, secure token storage, responsive UIs, and custom animations.

## Education

- BSc in Computer Science, Zagazig University.
- Expected Graduation: 2026.
- Last year Grade: Excellent.

## Internships

- DEPI (Digital Egypt Pioneers Initiative) – *Flutter Developer Intern*

Participated in a government-led initiative to develop cross-platform mobile applications using Flutter. Gained hands-on experience in Dart, Flutter, UI/UX design, state management, firebase, API integration, and gained a lot of experience in soft skills.

## Skills

- Flutter & Dart
- Clean Architecture
- Bloc / Cubit (State Management)
- REST API Integration (Dio)
- Secure Local Storage (flutter\_secure\_storage)
- Firebase (Auth, Firestore)
- Git & Version Control
- Error Handling & Debugging
- Responsive Design (flutter\_screenutil)
- Team Collaboration & Agile

## Projects

### Fastook (E-commerce App) – GDG Camp Final Project

Developed a complete e-commerce application with a team, implementing product browsing, cart, authentication, and payment features using Flutter, Firebase, and REST APIs.

### Toufwshouf (Tourism & Monuments Guide App)

Contributed to a mobile application that showcases monuments and tourist sites with detailed information and media integration, built with Flutter and REST APIs.

GitHub: [https://github.com/omar-949/touf\\_w/tree/toufwshouf](https://github.com/omar-949/touf_w/tree/toufwshouf)

### **Bookly (Books App)**

Created a Flutter application to fetch and display books using APIs, with category filtering, book details, and a clean user interface.

GitHub: <https://github.com/Omar20041223/bookly>

### **Shaghaf (Working Space Booking App)**

Collaborated in developing an app for booking working spaces, including authentication, room details, and scheduling features.

GitHub: [https://github.com/AhmedYasserww/shaghaf\\_app/tree/OmarMohmamed](https://github.com/AhmedYasserww/shaghaf_app/tree/OmarMohmamed)

### **Todo App**

Implemented a simple task management app with local storage and state management, allowing users to add, update, and delete tasks.
